github.com/mk9571 | Dausa, Rajasthan

Results-driven B.Tech Computer Science student (CGPA: 8.99) with hands-on expertise in software development, Data Structures & Algorithms, Object-Oriented Programming (OOP), and Machine Learning. Experienced in reverse engineering, static analysis, and building real-world applications. Seeking a software developer internship to apply problem-solving skills and deliver high-quality, scalable solutions in an agile development environment.

EDUCATION

Government Engineering College, Ajmer (GEC Ajmer) — B.Tech, Computer Science & Engineering — **2023 – 2027 (Expected)**
CGPA: 8.99 / 10

Jyotiba Phule Adaresh VM Sr. Sec. School — Senior Secondary (12th) — **83%**

Govt. Var. Upd. School — Secondary (10th) — **63%**

TECHNICAL SKILLS

Languages
C, C++, Java, Python

Core CS
DSA, OOPs Concept, SDLC, Multithreading

ML
Supervised/Unsupervised Learning, Reinforcement Learning

Deep Learning
Neuron, Perceptron, Propagation, Hyperparameter Tuning

Networks
Computer Networks, TCP/IP, HTTP/HTTPS

OS
Windows, Linux/Ubuntu

Database & DBMS
MySQL, SQL Queries, CRUD

Container
Docker, Kubernetes

AI Tools
Claude AI, Claude Code, OpenCode, ChatGPT, Gemini, Manus, NotebookLM, Google AI Studio, Google Labs

Gen AI
RAG, LLM, NLP, LangChain, Open-Source & Closed-Source Models

Profiling & Debugging Tools
Boost Graph, Flame Graph, Sanitizer, Valgrind

Tools
Git, GitHub, VS Code, Colab, Jupyter, Apktool, JADX

PROJECTS

SmartScan AI — *Android, Java, OpenAI Vision API, Camera2 API, REST API*
Available on Google Play Store: play.google.com/store/apps/details?id=com.smartscanai.app

- Developed an Android application using Java and Camera2 API to capture and scan real-world objects in real-time.
- Integrated OpenAI Vision API via REST API calls with JSON parsing to identify objects and deliver detailed AI-generated descriptions.
- Implemented efficient image processing and asynchronous API communication for a smooth, real-time user experience.

EXPERIENCE

Software Engineering Intern — JRS Innovation Solutions Inc, Jaipur — **May 2026 – Jun 2026**

- Completed a 45-day Software Engineering Internship at JRS Innovation Solutions, contributing to the development of industrial web applications for the Shift Logbook and Predictive Maintenance modules.
- Developed responsive web pages, resolved UI and functionality issues, and collaborated with the development team to enhance application performance and user experience.
- Contributed to an ongoing Android application by supporting backend functionality and debugging software issues.
- Participated in the design and development of an Issue Tracker project using Git and GitHub.

Research Intern – UAV Android APK Deobfuscation Framework, Government Engineering College, Ajmer (GEC Ajmer) — **Feb 2026 – Mar 2026 (2 Months)**

- Developed an SMT-based framework for deobfuscating UAV Android APKs by modeling obfuscated control flow as constraint systems and simplifying them using the Z3 SMT Solver while integrating Androguard and Triton for static and symbolic analysis.
- Designed the system to enable pattern-independent deobfuscation for unseen obfuscation techniques while preserving UAV-specific operational semantics.
- Contributed to an APK analysis tool that extracts permissions, detects obfuscation techniques such as control flow flattening and renaming, and generates structured inspection reports using Androguard.

CERTIFICATIONS

- C & C++ — Aptech Coaching Center, Ajmer
- Java & Python — Programming Express Coaching Center, Ajmer
- Software Engineering Intern — JRS Innovation Solutions Inc, Jaipur

COMPETITIVE CODING

- LeetCode: leetcode.com/u/manii_9571 — Solved DSA problems covering Arrays, Strings, Linked Lists, Trees, and Dynamic Programming.

ADDITIONAL INFORMATION

Languages: Hindi, English
Hobbies: *Playing Cricket, Watching Cricket, Exploring New Technologies*
Quick Learner • Team Player • Analytical Thinker • Adaptable • Detail-Oriented
