EDUCATION

GEC Ajmer
B.Tech, Computer Science & Engineering
2023 – 2027 (Expected) | CGPA: 8.99/10

Jyotiba Phule Adaresh VM Sr. Sec. School
Senior Secondary (12th)
Percentage: 83%

Govt. Var. Upd. School
Secondary (10th)
Percentage: 63%

CERTIFICATIONS

- C — Aptech Coaching Center, Ajmer
- Java — Programming Express Coaching Center, Ajmer
- Software Engineering Intern — JRS Innovation Solutions Inc, Jaipur
- Java Assessment Test — Infotact Solutions

COMPETITIVE CODING

LeetCode: leetcode.com/u/manii_9571 — DSA problems covering Arrays, Strings, Linked Lists, Trees & Dynamic Programming.

ADDITIONAL INFO

Languages: Hindi, English

Hobbies: Cricket, Exploring New Technologies

Quick Learner | Team Player | Analytical Thinker | Adaptable | Detail-Oriented

OBJECTIVE

Results-driven B.Tech Computer Science student (CGPA: 8.99) with hands-on experience in software development, Data Structures & Algorithms, Object-Oriented Programming (OOP), and building real-world Android, web, and backend applications. Skilled in Java, Python, C/C++, and REST API integration, with additional experience in reverse engineering and static analysis. Seeking a software developer internship to apply strong problem-solving skills and deliver high-quality, scalable solutions in an agile development environment.

TECHNICAL SKILLS

Languages: C, C++, Java, Python

Core CS: Data Structures & Algorithms (DSA), OOPs Concepts, SDLC, Multithreading

APIs & Frameworks: REST APIs, Streamlit

Database & DBMS: MySQL, PostgreSQL, SQL Queries, CRUD Operations

Networks & OS: Computer Networks, TCP/IP, HTTP/HTTPS, Windows, Linux/Ubuntu

Container: Docker, Kubernetes

Profiling & Debugging: Boost Graph, Flame Graph, Sanitizer, Valgrind

Tools: Git, GitHub, VS Code, Colab, Jupyter, Apktool, JADX

AI / ML: Machine Learning, Deep Learning, RAG, LLM, NLP, LangChain, LangGraph, MCP, AI Agents, Agentic AI

AI Tools: Claude AI, Claude Code, OpenCode, ChatGPT, Gemini, Manus, NotebookLM, Google AI Studio, Google Labs

PROJECTS

AI Travel Planning System — ***LangGraph, LangChain, Groq, Llama 3.3 70B, PostgreSQL, Streamlit, Tavily API, AviationStack API, Python***

- Architected a production-style multi-agent AI system that autonomously generates complete travel plans, orchestrating four specialized LLM agents — Flight Search, Hotel Search, Itinerary, and Final Response — as a stateful LangGraph workflow.
- Engineered real-time tool integrations with the AviationStack and Tavily APIs and implemented PostgreSQL-backed conversational memory so agents retain context across multi-turn sessions.
- Shipped an interactive Streamlit interface enabling users to generate and download budget-constrained, day-by-day itineraries end-to-end (e.g., a complete 7-day Japan trip with flights, hotels, and sightseeing under a fixed budget).

ResearchMind – Multi-Agent AI Research System — ***Python, LangChain, OpenAI API, Tavily API, BeautifulSoup, LCEL***
Live Demo: research-agent-system.streamlit.app

- Developed a multi-agent AI research assistant that automates web research and generates structured research reports.
- Integrated Tavily for web search and BeautifulSoup for extracting relevant content from web pages.
- Built Writer and Critic chains using LangChain and OpenAI to generate, evaluate, and improve research reports.
- Implemented a sequential workflow combining search, content extraction, report generation, and evaluation.

EXPERIENCE

Research Intern – UAV Android APK Deobfuscation Framework, GEC Ajmer — **Feb – Mar 2026**

- Designed an SMT-based deobfuscation framework for UAV Android APKs, modeling obfuscated control flow as constraint systems and solving them with the Z3 SMT Solver, integrating Androguard and Triton for static and symbolic analysis.
- Engineered the system for pattern-independent deobfuscation of unseen obfuscation techniques while preserving UAV-specific operational semantics.
- Contributed to a collaborative APK analysis tool that extracts permissions, detects obfuscation techniques such as control flow flattening and renaming, and generates structured inspection reports using Androguard.
